

S4/HANA Migration

How to successfully migrate
People matter – success counts

October 2020

SAP will provide mainstream maintenance for SAP Business Suite core applications until end of 2027

01

fact

Migration duration and approach varies due to differing complexity

02

analysis

Do a thorough analysis and readiness check to determine the optimal SAP architecture

03

strategy

Determine the right migration strategy, e.g. greenfield, brownfield or any approach specifically tailored for you

04

re-engineer

The real benefits can only be achieved by reengineering and optimizing your processes, not technology alone

05

digitalization

Use the opportunity to drive digitalization across the company

06

integration

Take a business process view to landscape integration, allowing for process optimization and streamlining

07

people

Prepare the employees and invest in change management and training to upskill not only on SAP

Treat the HANA migration as a business initiative to re-engineer and digitize the processes and make your company fit for the future

Thank you
